NEW ARCHITECTURAL PRODUCTS

ARCHITECTURAL SUNSHADES

GAMCO Architectural Sunshades integrate easily onto the Curtain Wall Systems. The projection creates shading effects that reduce solar heat gain while achieving maximum daylight. Outriggers and brackets are fabricated to custom designs and specifications with standard shapes of air-foil, cylindrical or flat louvers. Custom finishes are also available upon request to provide an almost infinite variety of design elements for architects, engineers and contractors.

SUNSHADES

Celebrating Over 25 Years of Quality Manufacturing
